RE: Carr Ranch Inc Concentrated Animal Feeding Operation
Facility ID: 71773
County: Garfield County
Program ID: LWC – NPDES GENERAL PERMIT - NEG022023
Subject: **Renewal of Coverage for NPDES General Permit Holders**

Dear James Carr,

On March 31, 2027 National Pollutant Discharge Elimination System (NPDES) General Permit - NEG022000 for Concentrated Animal Feeding Operations Confining Cattle in Open Lots or in Confinement Buildings will expire. According to Nebraska Department of Water, Energy, and Environment (Department) records, your operation currently has coverage under this permit. If an activity regulated by this permit is to be continued after the permit expiration date, the Permittee needs to apply for reissuance of its permit. The items listed below must be submitted by **October 1, 2026** as required by your current permit:

- A completed Form B and $200 application fee;
- A completed Form C;
- A complete nutrient management plan and supporting documentation as specified in Title 130, Chapter 14, unless such information has previously been submitted and is unchanged; and
- A Land Application Site Summary.

The new NPDES General Permit (NEG022000) that will replace your existing NPDES coverage is signed and ready for application submittal.

The Department recommends that you begin to assemble the required renewal information as soon as possible. Failure to submit all of the required information by the October 1 deadline will be considered a violation of your permit coverage and could subject your operation to possible enforcement action by the Department.

All Permittees previously authorized under permit number NEG022000 must continue to comply with the terms and conditions of the general permit until coverage is obtained under a new general permit, an individual permit or permit coverage has been terminated. Questions regarding this notice can be directed
